

PINTURA PARA CERÁMICA

FOR HOME OVEN

Special paint for decoration of ceramic, porcelain, glass and even metal (after phosphatizing AD treatment). With fixing with "home oven". Mixable colors with each other. Once the piece is painted, let it dry 24 hours, then bake for 15 minutes at maximum temperature 150° / 160°, achieving its maximum brightness. The lower the temperature, the longer cooking. Not toxic. Soluble in water.
